

Paragraph Hyperlinks

In MigraDoc, a hyperlink can be used after the document is rendered into PDF, RTF or HTML.

Local (Bookmark)

Hyperlinks with the *Local* or *Bookmark* types refer to a position in the same document which is defined with the keyword **\field(Bookmark)**. This hyperlink type is the default type which will also be used if no type is defined.

```
\paragraph
{
  \hyperlink[Type = Local Name = "Bookmark 1"]
  {Link to a bookmark}
}
...
\paragraph
{
  A bookmark.\field(Bookmark)[Name = "Bookmark 1"]
}
```

Link to a bookmark

File

This hyperlink type can be used to link a local file to the document.

```
\paragraph
{
  \hyperlink[Type = File Name = "../Paragraph-Layout.mddd1"]
  {Paragraph-Layout.mddd1}
}
```

Paragraph-Layout.mddd1

Web (Url)

With a hyperlink of type *Web* or *Url* you can link a website to your document.

```
\paragraph
{
  \hyperlink[Type = Web Name = @"http://www.empira.de"]
  {empira software GmbH}
}
```

empira software GmbH

Paragraph - Hyperlinks

A bookmark.

The [bookmark above](#) is used as a target from the hyperlink on the previous page.
