

Area

Area2D

\chart (Area2D)

[...]
{...}

Bar

Bar2D

```
\chart(Bar2D)  
[...]  
{...}
```

BarStacked2D

```
\chart(BarStacked2D)  
[...]  
{...}
```

Column

Column2D

\chart(Column2D)

{...}

ColumnStacked2D

\chart(ColumnStacked2D)

{...}

Line

You can customize the markers in a line style with four attributes, `MarkerStyle`, `MarkerSize`, `MarkerBackgroundColor`, and `MarkerForegroundColor`. The available marker styles are: None, Circle, Dash, Diamond, Dot, Plus, Square, Star, Triangle and X.

```
\chart(Line)
[...
{
    ...
    \series
    {
        MarkerStyle = Diamond
        MarkerSize = 5
        MarkerBackgroundColor = DarkBlue
        MarkerForegroundColor = Black
    }
    \series
    {
        MarkerStyle = Square
        MarkerSize = 5
        MarkerBackgroundColor = Magenta
        MarkerForegroundColor = Black
    }
    ...
}
```

Pie

Pie2D

\chart (Pie2D)

[...]
{...}

PieExploded2D

\chart (PieExploded2D)

[...]
{...}

Combine

You can combine area, column and line chart by setting the attribute `ChartType` in the data series to the wanted type.

```
\chart(Line)
[...]
{
    ...
    \series
    {
        ...
    }
    \series
    {
        ChartStyle = Column2D
        FillFormat.Color = PaleGreen
    }
    ...
}
```
