Units of Measure

Attributes that stand for physical sizes can be defined in points, centimeters, millimeters, inches or lines.

Point

One point is defined as 1/72 inch, that is about 0.35278 mm.

```
\textframe [Width = 150 …]
{…}
```

width: 150 point

A size specification in point can either be written as "150", "150pt" or "150 pt".

Centimeter / Millimeter

A size specification can be made in centimeters or millimeters.

```
\textframe [Width = "47mm" …]
{…}
```

width: 47mm

Inch

A size can be specified in inches. One inch is equal to 2.54 cm.

```
\textframe [Width = "3.6in" …]
{…}
```

width: 3.6inch
