Horizontal Pagebreak

With attribute **HorizontalPagebreak** it is possible to spread wide tables to multiple pages. Tables that doesn't fit on a page will be automatically horizontally split if this attribute is set to *true*. The vertical position of the table parts will be the same. To see the effect of the attribute, you should print the next two pages on different sheets of papers.

```
\section [PageSetup.HorizontalPagebreak = true]
{
  \table
  {
    ...
  }
}
```
