PageNumbering

The numbering of a document starts from 1 by default and will automatically increased for each page, which you can see in these few pages.

```
\paragraph
{
  This is section number : \field(Section)
  This page's number is : \field(Page)
}
```

This is section number : 1
This page's number is : 1

This is section number : 1
This page's number is : 2

This is section number : 1
This page's number is : 3

New Section

The page numbering will be continued even after you create a new section.

This is section number : 2
This page's number is : 4

This is section number : 2
This page's number is : 5

This is section number : 2
This page's number is : 6

StartingNumber

MigraDoc also provides the possibility to set the starting number of a section by setting the StartingNumber attribute to the desired page number, and the page number for the section will start at the given number.

```
\section [PageSetup.StartingNumber = 4]
{…}
```

This is section number : 3
This page's number is : 4

This is section number : 3
This page's number is : 5

This is section number : 3
This page's number is : 6
